BOND THAT'S DESIGNED TO ADD ELEGANCE.

EUROBOND, a leader in the Metal Composite Panel Industry, has been committed to offering innovative products and services for over two decades. Our commitment to innovation drives us to create architectural landmarks, empowering clients with a best-in-class range of panels.

Our state-of-the-art manufacturing facility at Umbergaon is equipped to produce 25,000 square meters of flawless metal composite panels every day. As a part of our manufacturing process, we use Alloy 3003, which lends high strength, impact resistance, and durability to our panels.

Our panels are coated with PVDF, providing superior resistance to dirt, scratches, and fading, as well as enhanced formability. We prioritize process control to ensure that our products meet the quality standards outlined in ISO 9001:2015.

Our rigorous quality control includes 50 in-house tests and third-party certifications, ensuring long lasting strength and durability, backed by extensive warranties enhancing trust and confidence in our brand, and making us architects' delight.

With over 300 designs spanning 20 ranges, our panels inspire creativity in architectural projects, offering a diverse palette for expression. In our quest for excellence, we engage in international collaborations with esteemed brands such as Euramax for coil coating and Rheinzink for Zinc panels. Together, we forge synergies that transcend geographical boundaries, ensuring that we remain synonymous with beauty and sophistication in every project.

So, let **EUROBOND** personify beauty in your project.

FORMIDABLE
FACADES WITH

The Skin Of Timeless Architecture

With a combined legacy of two centuries, EUROBOND proudly presents Zinc Panels for Facades in an exclusive collaboration with RHEINZINK, the leading manufacturer of Architectural Zinc.

Much like our skin, the enduring material Zinc naturally heals scratches, stains, and imperfections, a testament to its intrinsic beauty. Exposed to Oxygen, Water, and CO₂, Zinc undergoes a captivating transformation, developing a beautiful protective Patina that ages like fine wine.

What sets Eurobond Zinc apart?
